## PROFESSIONAL SUMMARY

Results-driven IT professional with an M.Sc. in IT (Data Science), currently working as an Associate Software Engineer at Tech Mahindra. Specializing in Python, LLM/RAG pipelines, agentic AI workflows, NLP, and deep learning. Microsoft Certified Azure AI Engineer and Google Data Analytics professional, proven in delivering end-to-end solutions from data engineering and PySpark-style pipelines through LLM evaluation and enterprise-scale AI deployment.

## WORK EXPERIENCE

### Associate Software Engineer | Dec 2024 – Present

Tech Mahindra | Kolkata, WB

- Worked on software development using React.js, JavaScript, Git/GitHub, and modern development workflows while strengthening debugging and problem-solving skills through hands-on technical assignments.
- Completed enterprise AI learning programs including Microsoft Azure AI Engineer, AI White Belt, and AI Blue Belt, gaining knowledge in APIs, backend systems, AI/ML concepts and AI-driven application development

### Summer Intern | Jun 2023 – Aug 2023

University Of Calcutta | Technology Campus

- Implemented machine learning techniques for spam detection, achieving an 82% accuracy by optimizing SVM classifiers and fine-tuning hyperparameters
- Analyzed and fine-tuned hyperparameters to maximize model performance, ensuring effective spam filtering.

## PROJECT

### AI-Powered Medical Document Assistant | [Link](#)

Tech Stack – Python, RAG, LangChain, FastAPI, Pinecone

- Developed an AI-powered Medical Assistant Bot using FastAPI, LangChain, Pinecone, and Streamlit for context-aware medical document question answering using RAG architecture.
- Built an end-to-end document processing and semantic search pipeline with vector embeddings, API integration, and intelligent retrieval system, improving scalable AI-driven healthcare document analysis.

### Customer Behaviour Analysis | [Link](#)

Tech Stack – Python, SQL, Power BI

- Developed an end-to-end customer behavior analysis project using Python, SQL, and Power BI to extract, clean, and analyze transactional data.
- Built interactive dashboards to identify key insights on customer segmentation, revenue trends, and purchasing patterns, enabling data-driven business decisions.

## EDUCATION

### Master in IT (Data Science) | 2022 - 2024

Maulana Abul Kalam Azad University of Technology | WB, India CGPA: 9.32 / 10.0

### Bachelor in Mathematics | 2019 - 2022

University of Kalyani | WB, India CGPA: 8.70 / 10.0

## TECHNICAL SKILLS

|                        |                                                                                    |
|------------------------|------------------------------------------------------------------------------------|
| Languages & Libraries: | Python (Pandas, NumPy) , SQL (MySQL),                                              |
| ML & AI:               | Classification, Regression, Agentic AI, Deep Learning, CNN, RAG, LangChain         |
| Visualization:         | Power BI, Excel (Advanced, VBA, Pivot Tables, Dashboards), Matplotlib, Seaborn     |
| Cloud & Tools:         | Microsoft Azure AI (Certified), Jupyter Notebook, Google Colab, Git/GitHub, Kaggle |
| Databases:             | MySQL — complex queries, data wrangling, business analytics                        |
| Soft Skills:           | Analytical Thinking, Problem Solving, Teamwork, Adaptability, Communication        |
